Marty

No, not for now. I have been put on field ops until tomorrow, but then I am not sure if I am going back to EU or not

I have no idea about this request. I recommend running it thru R8 EU since the state of CO is asking

I didn't take my name off the EU list because I may be headed back there tomorrow, not sure

Thanks
Chris

Are you still EUL? Sounds like this lady wants to build a plume model. I don't ever remember tasking this. Did you?

I started to upload my up-to-date files to a share file. It would best to coordinate the files through me because I keep adding information. Mike Dunn and OSM helped me learn the 3d modeling software to make the model.

It might be better to load to an EPA share file though.

Let me know what you want me to do.
